Historical Note (under construction)

The Coal Mining Institute of America (PCMIA) was organized in 1884 by the Coal Operators of Western Pennsylvania. The purpose of the Institute was to improve the status of the coal mining industry. The Institute was largely interested in new mining technology and in developing new uses for coal.

The Pittsburgh Coal Mining Institute of America (PCMIA) was formed in 1976 from the merger of the Pittsburgh Coal Mining Institute (PCMI) and the Coal Mining Institute of America (CMIA). The mission of the PCMIA is to encourage education and the growth of knowledge relating to coal mining, including providing scholarships, to advance study and research into mining methods, to promote safety and efficiency in the coal mining industry, to encourage closer cooperation between the coal industry and State and Federal government agencies, to disseminate information relating to the coal mining industry, and to advance the mutual interests of the members of the association.
